
Add a builder

Posted by hardtimes - May 12, 2008 3:10 AM

Can you please tell me how to add a builder to your forum?
Thanks

In order to start a forum thread on a particular builder, you need to navigate to the builder's rating page first. If you search for your builder and open up its ratings, you will see a "Builder Forum" link. Click on that to start a forum thread on your builder.
