
out of business

Posted by dvr21 - April 10, 2007 5:01 AM

This builder has gone bankrupt and may end up in jail for fraud. Search the Daily Record Newspaper for stories.

Overall, my experience with the contractor was quite negative, mostly for unfulfilled deadline promises. Most subcontractors were good when they showed up. The plumber was horrible, and made several mistakes. There was also a lot of turnover of "project managers" during our job, which went several months overtime. I'm glad to see them shut down.

Just updating my post...

turns out the owner was siphoning money. The people who did the work were simply not being paid in the end.

This company did a lot of work in my neighborhood (at least five houses). Overall we were happy with the work (except the plumber's cluelessness) and the product they created is something most of us are happy with here in the area.
